SCOTT'S LITTLE GIANT CORN AND COB MILL.

THERE are features connected with this Mill worthy of consideration and close examination on the part of those wishing to purchase a Feed Mill.

Its mechanical construction and adaptation to the purposes designed, to crash and grind ear corn. Its great capacity, while doing an impense work with extraordinary same, its durability is amply provided for. The complete and entire portableness of the Little Giant, rendering its greater convenience for plantation and farm use impossible. It requires no mechanical aid or bill of expense to put it up, any farm hand or servant can put up and set one running in half an hours time. The convenience with which the sweep may be applied to run horizontal—us is most usual—or over head, and the mill may be easily attached where steam or water is used. The power it takes, requiring one and two horses. The quantity and quality of product, 18 to 80 bashels of good feed meal per hour, according to the degree of fineness ground, and the sire mill. It is the cheapest mill, all things considered, there has been no present Right, energiating or buckstering about the coun-

another thing connected with the Little Giant, as a patent, and worthy of note, is the fact that there has been no Patent Right speculating or buckstering about the country, as is usual with the thousand bungling make shift implements that are got up as a trade—merely to get money by selling or palming off the patent right upon the creducts—then the machine to be abandored by all parties as a humbug; on the other hand the Patentee and Proprietors of the Little Giant Mills, believing that they can—and determined that they will supply the Agriculturalists and Stock raisers of our country with a superior Mill, are per manently engaged in the business, and have over one hundred thousand dollars invested in the manufacture of these mills, in the East, West and South, some of these establish ments employing 60 mensulely in this business. So highly are these mills appreciated, that four thousand have been sold within the past eighteen months, and the heaviest and the most extensive Manufacturers of Agricultural implethe most extensive Manufacturers of Agricultural implements in the United States have eagerly sought an inter-

No implement has been more thoroughly tested; no one of the kind has received so numerous and high testimonials from Mechanics' institutes and Agricultural Associations, and none by reason of substantial, practical utility and ment have more fairly ground their way into every day use and popular favor than Scott's Little Giant Corn and Ceb Mill. FARMERS AND STOCK RAISERS, I offer you a Corn and Cob Mill unsurpassed in the Union, and which cannot be superceded by past or future inventions. It is the very Mill which every Farmer and Stock Kanser should have; it will crush from 8 to 10 bushels Corn and Cob per hour, with one horse; is easily fitted up and managed; weighs 540 lbs., and as all contact of the grinding surfaces is prevented, will last any farmer an or-dinary lifetime. I speak thus of its durability because the same principle has been fairly tested in the old Bark Mill.

Who is it that wants

A MILL ON TRIAL for one month, and if it don't give complete satisfaction, return it? If there be any man thus disposed, let him now speak. Satisfaction is warranted in every case, or the money will be refunded. This Crusher can be attached to horse, water or steam power, which renders it the most convenient Mill south of Mason's and Dizon's line. All

AYER'S PILLS.

A NEW and singularly successful remedy for the cure of A all Billious diseases—Costiveness, indigestion, Jaundice, Propsey, Rheumanism, Fevers, Goul, Humors, Nervousness, Irritability, Inflammanions, Hendas Pains in the Breast, Side, Back and Limbs, Fermale Compisints, &c., &c. Indeed, very few are the diseases in which a Purgative Medicine is not more or less required, and much sickness and suffering might be prevented, if a barmless but effectual Catharite were more freely used. No person can feel well while a costive habit of body prevails: besides, it soon generates serious and often fatal diseases, which might have been avoided by the timely and judicious use of a good purgative. This is alike true of Coids& everish symptoms, and Billious distangements: they all tend to become or produce the deep seated and formidable distempers which load the hearses all over the land. Hence a relimble family physic is of the first importance to the public health, and this Pill has been perfected with consummte skill to meet that demand. An extensive trial of its virtues by l'hysicians, Professors and Patients, has shown results surpossing any thing hitherto known of any medicino. Cures have been effected beyond bellef, were they not substantiated by persons of such exalted position and eigenster as to foothild the searching of angles. of any medicino. Cures have been effected beyond beind, were they not substantiated by persons of such exaited position and character as to forbid the suspicion of untruth. Among the many eminent gentlemen who have testified in favor of these Fills, we may mention:

Ild space permit, we could give many hundred certificates from all parts where the Pills have been used, but evidence even more convincing than the experience of eminent public men, is found in their effects upon trial.

Those Pills, the result of long investigation and study, are horse, water or steam power, which renders it the most convenient Mill south of Mason's and Dixon's line. All other Crushers now in the south require too much power, or will about wear out. According to THE LAWS OF NATURE a Corn and Cob Mill which admits of a lateral or washing motion, will, necessarily, soon wear out, allother Crushers are amenable to this grand objection, and the Proprietors dare not dispute it. In the construction of "Young Americas," I have gained power, and I defy contradiction; I have lessened friction, and II challenge one word to the contrary; I have prevente da washing lateral motion, and all are compelled to acknowledge it; therefore, I assert that it is far superior to any other Mill. I am now selling this Tennessee invention at the small sum of FIFTY DOLLARS.

The proprietor, in calling the attention of the public to this preparation, does so with a feeling of the utmost confidence in its virtues and adaptation to the diseases for which it is recommended.

It is no new and untried article, but one that has stood the test of a ten years' trial before the American people, and its reputation and sale is unrivaled by any similar preparations extant. The testimony in its favor given by the most prominent and well known Physicians and individ
